Hours: 13.00 - 19.30 Monday – Wednesday – Friday; 7.00 - 13.30 Tuesday-Thursday - Saturday;

For emergencies when the center is closed, patients should contact their doctor or the Emergency Department.

MAIN ACTIVITIES

The Complex Nephrology Operating Unit of AULSS 7 Pedemontana includes the hospitals of Bassano del Grappa, Santorso and Asiago.

The nephrology of the Asiago Hospital which is a Limited Assistance Center (C.A.L.); in fact, the nephrologist is not always present in this office; we deal with all pathologies involving the kidneys, i.e. "nephropathies" (excluding surgical pathologies), including primary and secondary glomerulonephritis to systemic, dysmetabolic, haematological or neoplastic diseases.

Another field of diagnosis and treatment is represented by arterial hypertension (blood pressure) which can lead to kidney damage and lead to kidney failure.

Nephrology also studies calcium phosphorus metabolism with particular regard to kidney stones. We also treat urinary tract infections both upper (kidney) or pyelitis and pyelonephritis and those low (bladder) or cystitis.

A large area of interest to us is both acute and chronic renal failure, which can be cured or with medical therapy or dialysis.

We treat renal failure, acute and chronic, with both medical therapy and dialysis. In fact, two types of dialysis treatments are available in all our facilities: extracorporeal dialysis and peritoneal dialysis; if the patient requires hospitalization and/or intensive nephrological specialist care, hospitalization in the Bassano del Grappa hospital may be necessary.

Extracorporeal dialysis (hemodialysis) is performed at the Asiago hospital; both peritoneal dialysis is performed instead, thanks to its simplicity and the absence of circulating blood, it can easily be performed at home by the patient himself and obviously also at the hospital if necessary.

During the year during the summer holidays, we host tourists who need to perform hemodialysis treatments, subject to authorization by the nephrologist of the nephrological center of origin and subject to availability of the centre.

	SERVICES CARD
NEPHROLOGY AULSS7 PEDEMONTANA

INFORMATION ABOUT CARE AND ASSISTANCE

The Nephrology Clinic is normally operational once a week at the Asiago hospital, it is located on the ground floor; ordinary dialysis activity is instead guaranteed on the following days and times:

13.00 - 19.30 Monday - Wednesday - Friday; 7.00 - 13.30 Tuesday-Thursday - Saturday;

ENTRY INTO THE DEPARTEMENT

It is good to bring with you:

- Identity card;
- Health insurance card;
- Any clinical documentation possessed;

Medicines taken at home (even if they are laxatives, painkillers or cough syrups).

At the entrance, you will be asked to indicate the name and address of the person authorized to receive information on the patient's state of health. Healthcare personnel will not be able to inform anyone about their state of health without explicit authorization and in any case never by telephone.

Please note that patients and family members are explicitly prohibited from photographing or videotaping people/environments within the facility without having requested and obtained prior authorization from the Medical Department and release from the interested parties.

It is advisable not to keep jewellery, valuables and large sums of money in the hospital.

RULES OF CONDUCT

- Family members are requested to respect visiting hours and not to sit on hospital beds.
- In the hospital rooms and in the common areas available, in respect of the other patients; it is advisable to keep the volume of the voice low and to use any radio and television equipment with discretion.
- The mobile phone must be kept in silent mode and must not be used when the healthcare personnel work in the hospital room or during tests or visits.
- It is absolutely forbidden to smoke inside the hospital; outdoors it is allowed in the special area near the main entrance.
- The consumption of alcoholic beverages is not permitted.
- To leave the ward you must ask the nurse on duty, you must not leave without having warned.
- To avoid infections it is essential to wash your hands often and always after using the toilets, with soap and water or with the hydroalcoholic solution available in the common areas; family members are also invited to maintain the same behavior.
- To facilitate hygiene and cleaning operations, it is advisable to keep the bedside table in order.
